SENTINEL**DNA**™

⟳SENTINEL®

THE INTELLIGENT OFFENDER MANAGEMENT PLATFORM

SentinelDNA™ is the offender management platform that enables corrections agencies to monitor all of their program activities from any device. Users create customized dashboards for activity tracking, robust case management, inventory management, and advanced analytics.

Supervising officers can manage every aspect of a participant's case through a single screen. GPS tracking, electronic monitoring, remote alcohol testing, community based programs, and full service offender management are all accessible at the click of a button to handle even the largest case loads.

Advanced Data Analytics allow you to take offender management to the next level. Make better, more well informed decisions with SentinelDNA.

Supervising Officer Dashboard

+ CLIENT DASHBOARD
Create dashboards to meet your unique needs. Participant activity can be viewed and accessed in real-time with just a few keystrokes. Available on smartphone, tablet or PC, this convenient tool puts you in the driver's seat to access the most important information when you need it.

+ INVENTORY MANAGEMENT
Comprehensive inventory management enables officers to track all program equipment. Access an Inventory Control Dashboard to easily request, process, and manage equipment orders and returns from a smartphone or computer. View participant or program device counts, history, and currrent status on screen or in reports.

+ CASE MANAGEMENT
Leveraging more than 25 years of case management experience, Sentinel developed a robust system to handle every aspect of a participant's supervision. This includes financial management, counseling, community service, and other court ordered requirements. Whereever the data resides, SentinelDNA offers a single point of access to all participant information.

+ ADVANCED DATA ANALYTICS
Capturing, analyzing, and responding to enormous amounts of GPS data is more difficult than ever. Advanced Data Analytics helps supervising officers identify locations frequented by participants, record their travel patterns, and map locations where multiple participants co-locate. SentinelDNA combines this information with participant schedules, victim locations, and variations to normal travel patterns to help officers recognize deviations, cross-references known crime locations and identify potential violations. That's Intelligent Offender Management.
