

OM400™

GPS Tracking

The OM400 is a one-piece GPS/cellular monitoring device specifically designed to track low to high-risk participants 24/7. The OM400 can pair with an optional RF Beacon to more precisely verify home locations.

Backup tracking technology, direct communication with participants, and onboard memory to store events and zones are just a few of the features that make this the location tracking solution of choice for hundreds of corrections agencies across the country.

ESSENTIAL FEATURES

- + **Store 300+ inclusion and exclusion zones** on device allowing zone alert notifications in real-time regardless of transmission rate
- + **Pursuit Mode** increases transmission rate if in an exclusion zone or if in pursuit of the participant
- + **Minute-by-minute tracking options** can provide in-depth details of a participant's movements
- + **Waterproof** up to 10 meters
- + **RF compatible Beacon Unit** option
- + **Signal to participants** via vibration and sounds with ability for participant to receive and acknowledge receipt
- + **Advanced Forward Link Trilateration (AFLT)** serves as a secondary tracking system (cellular)
- + **Extensive storage capacity** in case of communication interruption
- + **Unique mobile inclusion, exclusion and buffer zones** for domestic violence situations
- + **Proprietary signal encryption** for protecting data

At the Core of What We Do.

SentinelDNA is the intelligent, offender management platform with advanced analytics. SentinelDNA provides single-screen access to our comprehensive set of products and services:

GPS Location Tracking. RF Monitoring. Remote Alcohol Testing. Substance Abuse Screening. Community-Based Programs. Full-Service Offender Management.
