

# COGNITIVE SKILLS

## TRAINING PROGRAMS

Delivered locally in the community, Sentinel offers cognitive skills programs based on Moral Reconciliation Therapy (MRT). MRT is evidence based methodology focused on addressing criminogenic need, helping offenders improve their moral reasoning ability. The anticipated outcome is better judgement and decisions.

MRT has been recognized by several studies to reduce recidivism. The programs confront entrenched criminal behavior and can be applied in any corrections stage, from pre-trial to post-sentence. The program creates positive behavioral change in offenders with deeply-rooted problems.

## ADDRESSABLE RISKS AND COURSES

The primary goal of MRT and all of our programs is to assist our customers in helping their participants return to the community as law abiding citizens. Each agency creates a customized plan to meet the participant's specific needs and local Sentinel staff deliver appropriate course curriculum at required frequencies.

### Risk Factors and Criminogenic Needs Addressed

- Criminal orientation and antisocial beliefs
- Antisocial associates or peer relationships
