

TRANSDERMAL ALCOHOL MONITORING

SCRAMx is the only scientifically proven and court-validated continuous transdermal alcohol monitoring device available. Technologies such as SCRAMx have taken center stage as a way to greatly enhance participant supervision and accountability at a fraction of the cost of incarceration.

SCRAMx provides flexible options for the type and intensity of supervision while enabling participants to maintain a job and meet family obligations. SCRAMx is the only continuous alcohol monitoring product that does not require a secondary test to confirm a drinking event by a participant.

Bracelet

Base Station

ESSENTIAL FEATURES

- Testing gaps are eliminated as participant cannot miss a test
- Automatically tests for the presence of alcohol every 30 minutes, 24 hours a day
- Used by 100,000+ offenders across the US
- Works well in conjunction with treatment to enforce compliance and better identify when intervention may be needed
- Multiple sensors offer best-in-class tamper detection, placement of obstructions, and attempts to remove the device
- Flexible monitoring levels for multiple needs
- Optional RF in-home monitoring station
- RF base station communicates with monitoring center via landline, cellular, or ethernet
