

RF Patrol is among the most reliable and complete radio frequency (RF) home monitoring systems on the market. Its simple and durable design makes it the product of choice for agencies across the country.

The system is comprised of an ankle-worn transceiver and a stationary home monitoring unit (HMU). The HMU and transceiver continuously communicate with each other via RF signal. The HMU monitors any change in transceiver status and reports immediately to Sentinel's Monitoring Center via a cellular network to ensure timely notification to supervising officers.

The HMU can monitor up to 50 transceivers simultaneously making it ideal for halfway houses and group housing.

Transceiver

Home Monitoring Unit

ESSENTIAL FEATURES

Transceiver (ankle bracelet)

- Small, lightweight, durable
- Tamper resistant, fiber-optic strap
- Extended battery life
- Hypoallergenic material
- Waterproof up to 10 meters
- Low battery and tamper alarms

Home Monitoring Unit

- Easy to read front panel LCD
- Displays text messages from supervising officer
- Rechargeable backup battery, up to 48+ hours
- Adjustable range settings
- Cellular communication
- Tracks all entry and exits of participant
- Nonvolatile memory records more than 1,000 events

At the Core of What We Do.

SentinelDNA is the intelligent offender management platform with advanced analytics. SentinelDNA provides single-screen access to our comprehensive set of products and services.

GPS and RF Electronic Monitoring * Remote Alcohol Testing * Substance Abuse Screening
Domestic Violence Monitoring * Cognitive Skills Training * Full-Service Offender Management.
